PROPOSAL FORMAT

NOTE: AI tools like the CHATGPT can NOT be allowed to support the writing of the proposal.

1. TITLE of the Proposal
   (**Precise short title** describing your goals.)
2. Abstract
   (descriptive/ graphical)
3. Mind-map
   Describe your goals by connections using a **mind map**.
4. Introduction
   a. Background (Why / What is the need for this research)
   b. Problem statement (Define the significant problem you want to work)
5. Objectives
   A **clear, concise, objective** statement should include the study's primary goal.
   If it is a broader goal, give sub-objectives.
6. Literature review
   Write the **research gap** of the papers you have referred to.
   Justify how you will overcome the problem.
   Attach the research papers for our reference in pdf format when you submit the proposal.
7. Methodology
   Detailed methodology, including (Design, materials and methods, operation parameters, facilities, etc.)
   Precise flowchart of the method
8. Expected outcomes.
   (describe the anticipated result you expect from your experiment plan)
9. **Working schedule** within your internship
10. References
